

## MOBILE TELEMEDICINE STATION

Providing quality healthcare services to everyone, everywhere is an economic and logistical challenge. Validus Medical's Mobile Telemedicine Station helps eliminate many of these challenges by offering videoconferencing technology that connect patients and healthcare professionals regardless of location or time of day. Ideal for long-term care facilities, nursing homes and hospitals, the Mobile Telemedicine Station functions as a desktop station complete with easy-to-use touchscreen interface, high-definition camera, multiple peripheral options and the ability to capture, store and retrieve digitally annotated notes.

### Features:

Easy-to-use touchscreen interface

---

Waterproof keyboard

---
