## PORTABLE TELEMEDICINE CASE

Validus Medical's innovative Portable Telemedicine Case connects healthcare professionals to those requiring care, regardless of distance or time of day. Our portable telemedicine case is a compact, self-contained system that functions as a desktop station complete with keyboard, mouse, touchscreen, 2-way webcam and multiple USB ports for plug-in medical evaluation devices. Lightweight and extremely durable, the Portable Telemedicine Case makes it easy for our healthcare providers to conduct comprehensive medical exams/ consultations in a variety of settings.

### Applications:

Crisis Management • Home Health Care  
Long-Term Care Facilities  
Mobile Health Clinics • Rural Clinics • Schools

### Features:

Ability to write SOAP notes and print to PDF for uploading into existing EMR
